

Woven Turtle

Materials: Popsicle sticks, super glue, markers, colorful yarn

Procedure:

1. First take three popsicle sticks, lay on down and then make an "X" on top with the other two. Use a hot glue gun and glue the sticks together in the middle where they overlap.
2. If you want, color your sticks in with a marker, adding little feet and a face.
3. Then take a long piece of yarn and wrap it around the turtle, across the center 2 to 3 times so it covers the middle portion. You want to leave a little excessive yarn over, so when you're done you can tie your last piece of yarn to your first piece of yarn.
4. Then begin to weave yarn around each stick; place yarn over a popsicle stick, wrapped it around once, and then place yarn over the next popsicle stick, and wrapped it around... continue this pattern till your turtles shell is made. if you want to change colors, just tie a piece of yarn onto the end and continue weaving.
5. When you are done, tie your first piece of yarn to your last piece of yarn
